

Instructions for Authors—*Physics in Perspective*

All submissions should be submitted electronically only. Please follow the hyperlink “Submit your manuscript” and upload all of your manuscript files following the instructions given on the screen.

All papers will be considered under the explicit understanding that they are not under consideration for publication at any other journal.

Manuscripts should be double-spaced throughout with 1” margins on all sides. Please use Times New Roman 12 pt font; do not use bold-face except for the section titles.

Please give figure numbers and captions at the end of the paragraph closest to where the figure should appear. Please supply the figures as separate files, rather than embedding them in the text. Figures should be tiff (or jpeg) files at high resolution (at least 300 dpi at the desired print dimensions). (If you wish, for purposes of submission you may send accompanying the text another file with all the figures, each accompanied by its caption. Papers accepted for publication will need to have each figure as a separate file at high resolution.)

Each section begins with a **bold-face title** line in title case. The first paragraph of each section is not indented, though all subsequent paragraphs should be. Please leave only one space after a period and do not put a blank line between paragraphs.

We follow the Chicago Manual of Style (CMOS, latest edition) with some exceptions stated below and Merriam-Webster Dictionary. Please consult these carefully for any questions you may have about usage or spelling.

Authorship

Submission of a manuscript implies

- that the work described has not been published before;
- that it is not under consideration for publication elsewhere;
- that its publication has been approved by all co-authors, if any, as well as by the responsible authorities at the institution where the work has been carried out;
- that, if and when the manuscript is accepted for publication, the authors agree to automatically transfer the copyright to the publisher;
- that the manuscript will not be published elsewhere in any language without the consent of the copyright holder;
- that the manuscript should be written in English.

The Editorial Process

There is no rigid page limit for articles, but overly long ones require special justification to be published. Manuscripts must be submitted electronically (see below) and will be acknowledged promptly. If the Editors-in-Chief judge the manuscript to be worthy of consideration for publication in *Physics in Perspective*, it may be sent to one or more referees who are competent to judge it and who will remain anonymous to the author. After the manuscript has been refereed, the Editors-in-Chief will notify the author of its acceptance or rejection for publication, and if accepted, of any revisions required prior to publication.

Format of Manuscripts

General Layout: *Manuscripts should be written in a style suitable for a broad audience of readers.* All pages should be numbered consecutively, including references, tables, and figure captions.

All text, including figure captions, tables, and references, should be double spaced in Times New Roman 12 point, with margins of 1 inch (2.5 cm) on all sides. The right-hand margin should be left ragged (unjustified) to facilitate readability. Quotations of more than one hundred words should be indented and not enclosed in quotation marks. All special characters and diacritical marks must be included and clearly indicated. Italic font should be used (sparingly) when needed in the text or notes; bold-face font should be reserved for section titles and for the volume number of journals. *Physics in Perspective* follows the conventions of the *Chicago Manual of Style* (latest edition) and the *Merriam-Webster English Dictionary*, but as detailed below distinguishes between explanatory footnotes and endnote references, in which book publication locations and article page ranges are stated.

Title Page: On a separate title page, manuscripts must include a title as well as an abbreviated title that will be used as a running head (no more than 60 characters), whereby only the first word, proper nouns and acronyms should be capitalized.

Below the title, please list the names (first name, middle name (initial(s)) and last name) as well as full postal addresses of authors, clearly indicating which address relates to which author. The author to whom correspondence is to be addressed should be indicated separately. To ensure rapid publication please indicate e-mail address for fast communication.

Please also provide a short biographical note (25 words or fewer) for each author, which will be printed as a footnote to the author’s name.

An abstract (one single paragraph, no more than 150 words) that enumerates the principal facts and conclusions should accompany each paper, as well as a short list of appropriate keywords.

Names and Dates: The first time a proper name is given in the text, the full name (or initials when the full name is unknown) should be given; subsequently, only the last name needs to be given. Dates should be given in the usual form (month, day, year), for example May 5, 1968.

Figures and Tables: Figures and tables must be referenced in the text. Figures and tables must be numbered serially with Arabic numerals and provided with concise, descriptive captions. Please insert a callout showing the figure number and caption immediately following the paragraph in which the figure is first mentioned. Each figure must be supplied with a credit (acknowledging the copyright holder whose permission has been received for use of the image) or indication of its source (if the figure comes from a printed work).

Indicate in the margin of the manuscript where figures and tables are to be inserted.

Electronic versions of your figures must be supplied separately from the text.

For vector graphics, EPS is the preferred format. For bitmapped graphics, TIFF is the preferred format. The following resolutions are optimal:

- Line figures: 600-1200 dpi
- Photographs: 300 dpi
- Screen shots: leave as is

Font-related problems can be avoided by using one standard font, preferably Times New Roman.

Colored illustrations can be printed by special arrangements, at the author’s expense.

Authors bear the responsibility for obtaining permission to reproduce any photographs or other copyrighted materials that appear in their articles. They must also insert into the figure captions any acknowledgment required by the copyright holder.

Some Common Questions about Style: Please note the difference between a *hyphen* (-), an *en-dash* (–), and an *em-dash* (—). *Hyphens* (-) are used only to make compound words, according to the dictionary usage. *En-dashes* (–) are used for date or page ranges (e.g., 1950–70). *Em-dashes* (—) are the dash used occasionally in sentences, according to CMOS, they should not be preceded or followed by spaces. You will greatly help us by entering them accordingly into your manuscript; you can get an en-dash by pressing the two keys alt/option and the hyphen at the same time; for an em-dash, press shift + alt/option + hyphen at the same time.

PIp refers to page numbers *without* using the abbreviations p. or pp.

Please note that we obey the strict rule regarding the use of *which* vs. *that*. “In edited American prose, *that* is used restrictively to narrow a category or identify a particular item being talked about [e.g., ‘any building that is taller must be outside the state’]; *which* is used nonrestrictively—not to narrow a class or identify a particular item but to add something about an item already identified [‘alongside the officer trotted a toy poodle, which is hardly a typical police dog’]. Which should be used restrictively only when it is preceded by a preposition [‘the situation in which we find ourselves’]. Nonrestrictively, it is almost always preceded by a comma, a parenthesis, or a dash.” CMOS 5.254 under that; which; see also 6.29

Footnotes and Endnotes: Authors should distinguish between footnotes, which are explanatory in nature, and endnotes, which are citations to the literature. Explanatory footnotes should appear in the text as sequential, raised lower-case letters (a, b, c, etc.). Endnotes should appear in the text as consecutive, raised Arabic numerals (1, 2, 3, etc.). The endnotes themselves should appear in numerical order at the end of the text. The number of both footnotes and endnotes should be kept as small as possible. *Remember that Physics in Perspective is directed to*

a general, non-specialized audience. Endnotes, in particular, should be viewed only as a guide to the literature, and not as providing a comprehensive survey of it. A quotation from a previously published work should be acknowledged with an endnote whose number should appear in the text at the end of the quotation.

Endnotes (citations to the literature) should in general be in the language of first publication.

Cite all journal titles in full (e.g. *Physical Review* rather than *Phys. Rev.*) Both beginning and ending page numbers must be given.

Examples:

• Citations to books:

John M. Blatt and Victor F. Weisskopf, *Theoretical Nuclear Physics* (New York: Wiley, 1953), 27.

James Chadwick, ed., *The Collected Papers of Lord Rutherford of Nelson, O.M., F.R.S.* (London: Allen and Unwin, 1963), 2:83–87. [Citing volume 2 of this work.]

• Citations to articles in journals or anthologies:

Eugene Wigner, "On the Mass Defect of Helium," *Physical Review* 43, no. 4 (1933), 252–57, 253. [Citing a specific page in this article.]

Serge Korff, "High Altitude Laboratories," *Physics Today* 2, no. 11 (1950), 17–23. [The issue number should be included even if the journal numbers its pages sequentially through a volume.]

Philip Dee, "Some Reminiscences of the Discovery of the Neutron", in *Cambridge Physics in the Thirties*, ed. John Hendry (Bristol: Hilger, 1984), 46–48.

Albert Einstein, "Eine Theorie der Grundlagen der Thermodynamik," *Annalen der Physik* 11 (1903), 170–87; reprinted in John Stachel, ed., *The Collected Papers of Albert Einstein* (Princeton: Princeton University Press, 1989), 2:77–94. [citing volume 2 of this series]

• Avoid using "ibid" and other abbreviations to refer to previously cited works. Instead, use a short citation with a reference pointer indicating where the full citation appears:

Blatt and Weisskopf, *Nuclear Physics* (ref. 28), 37.

Wigner, "Mass Defect" (ref. 33), 255.

Submission of Manuscripts

Please follow the hyperlink "Submit your manuscript" and upload all of your manuscript files following the instructions given on the screen. Please submit your manuscript as a word-processed document in Word format.

Figures should also be submitted in digital form, preferably in TIFF (.tif) format, alternatively in JPEG (.jpg) or Photoshop (.psd) format. Digital drawings and graphs should be submitted in Encapsulated PostScript (EPS).

Keeping back-up copies of the submitted files is the author's responsibility.

Galley Proofs

Proofs will be sent to the author after the manuscript has been typeset. Unless indicated otherwise, they will be sent to the corresponding author directly from Birkhäuser / Springer Basel AG and should be returned, together with the reprint order form within 10 days after receipt.

The author bears entire responsibility for checking the accuracy of the final text, including its quotations and citations.

Neither Birkhäuser / Springer Basel AG nor the Editors will assume any responsibility for any reason for delayed proofs, errors in the original manuscript or major alterations in proofs.

Reprints

The corresponding author will receive a PDF file and 50 reprints of the respective article free of charge. Additional reprints may be ordered in lots of 50 when the final corrected page proofs are returned. Orders submitted thereafter are

subject to considerably higher rates (prices for additional reprints can be obtained through the Publisher).

Open Choice

In addition to the normal publication process (whereby an article is submitted to the journal and access to that article is granted to customers who have purchased a subscription), Open Choice now provides an alternative publishing option. An Open Choice article receives all benefits of a regular "subscription-based" article, but in addition the full text is made available publicly through the journal's online platform SpringerLink immediately after publication.

To publish via Open Choice upon acceptance of your article, please complete the relevant order form and provide the required payment information; the order form will be sent to you by our production department together with the page proofs of your article. Payment must be received in full before publication or articles will be published as a regular subscription-model article. For further information please see the link "How to publish with us" under "For Authors" on the Physics in Perspective website.

Copyright Statement

The copyright covers the exclusive right to reproduce and distribute the article by means of printing, reprinting, or any other method deemed appropriate by the Publisher including electronic means, photographic reproductions, microfilm, or any other reproductions of similar nature, as well as translations.

Unless otherwise specified Birkhäuser / Springer Basel AG holds all rights. All articles published in this journal are protected by copyright; they may not be duplicated in hard copy or machine readable form or reproduced photographically, and they may not be redistributed, transmitted, or translated or stored on microfilm, in electronic data bases, on local servers, video disks, etc., without prior written permission from Birkhäuser / Springer Basel AG. Commercial use or redistribution can only be allowed by specific licence agreement.

Photocopying

Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission of the publisher and payment of a fee are required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. In the USA, users may clear permissions and make payment through the Copyright Clearance Center Inc., 222 Rosewood Drive, Danvers, MA 01923, USA (<http://www.copyright.com>).

In Germany, users may clear permissions and make payment through the Verwertungsgesellschaft Wort, Goethestrasse 49, D-80336 München, Germany (<http://www.vgwort.de>). In other countries where a local copyright clearance center exists, please contact it for information on required permissions and payments.

Disclaimer

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the author(s), the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. In no event will the author(s), the editors, or Birkhäuser / Springer Basel AG be liable for direct, indirect, special, incidental, or consequential damages arising out of the use or inability to use the information contained in this journal, even if the author(s), the editors, or Birkhäuser / Springer Basel AG has been advised of the possibility of such damages.

BOOK PUBLISHING ESSENTIALS - FREE MINI COURSE

Sign up for Springer Nature's free mini-course on book publishing, to get a comprehensive overview and all the essential details, directly to your inbox.

Over several weeks, you'll receive 5 email modules that cover everything you need to know about the book publishing process:

- Module 1: The initial stages
- Module 2: Preparing and submitting your manuscript
- Module 3: Author services
- Module 4: Getting your book noticed
- Module 5: Research in support of the Sustainable Development goals (SDGs)

TRANSFORM YOUR RESEARCH INTO AN OPEN ACCESS BOOK

If you are looking to ensure your book reaches the widest possible audience, open access (OA) publishing makes this achievable, offering a rewarding experience for the hard work you've invested in writing your book.

Publishing your book OA can bring you greater benefit including:

- More citations, downloads and online mentions
- Reach greater geographical areas
- Free for readers to access
- Authors retain copyright

Springer Nature and its imprints, including Springer, Palgrave Macmillan, and Apress, publishes more academic books than anyone else in the world.
